Variable-message signs

VMx Range

Manufactured in France and Spain, our equipment combines technological innovation, energy optimisation and compliance with current standards, and is suitable for all types of environments.

Available in full-matrix and full-colour versions, made from aluminium and steel, all of the equipment in the range can have its symbols modified and be adapted to operating policies, while remaining in compliance with European standards.

COMPLIANT WITH OPTICAL STANDARDS

DEDICATED OPERATING TOOL AVAILABLE

LIFE CYCLE OF 15+

ECODESIGNED EQUIPMENT

APPLICATIONS

The signs in the VMx range are perfectly adapted to all your needs:

- Urban VMS
- Motorway and expressway VMS
- Two-way road VMS
- Tunnel VMS

VMx AUTONOMOUS

The autonomous version of the VMx works with solar energy only, while ensuring optimal distribution of information. This solution offers unprecedented energy efficiency.
